Great news!

The building contractors for our new school building will start to install temporary fencing on Monday 12 June. This will restrict some play areas and students will have to move into our new play areas.

Other works due to begin soon are: the new access path to the school rooms and the installation of the builders buildings on the grassed grounds of the carpark. The new access path will involve the buses stopping in a different location - it will be near where the school bus is currently parked.

I will be able to give you and the students more information as soon as the department gives approval for the plans and building activities to be released to the public.

Regards

David
